Preliminary Findings – Institutional set-up

Preliminary Findings – Institutional set-up

NAFO:

- Detailed and consensual advice in a good timing
- Almost no NGOs participating
- Rather easy negotiating position for EU

ICCAT:

- Diverging positions : Tuna (FR/ES) – Sharks (Industry/NGOs) and advice out of the timing
- A lots of NGOs participating
- Very complicated negotiating position for EU

However LDAC is proposing common ground on observer coverage, principles of sound-based management, labour conditions, ... could also act as facilitator in the plenary.

Preliminary Findings – International policies streams

- Resource management (FAO)
 - Labour condition (ILO)
 - Trade (WTO)
-
- LDAC is at the cross-roads of these policies and with **improved recognition in the cooperation framework at regional and international level** (openness, modern, forward thinking, proactive, ...)
 - LDAC could contribute to support EU in developing a level playing field at international level (Collaboration with MAC around EU "market power")

Preliminary Findings – Possible way of improvements

- **Memorandum of Understanding** with NAFO / ICCAT / IOTC ...? COFI ? UN ? As concrete work plans to be monitored by the RFMO's commission
- **Side-events during plenary meetings** as a way to raise profile of the LDAC, and identify contact persons
- **Regional partnerships / dialogs**
(Africa, Latin America ?, Indian Ocean ?) in alignment with EU partnerships and cooperation practises
- **Involvement in cooperation projects (PESCAO, FARFISH)**

TOWARDS CAMPAIGNING

Targets and milestones to be identified collectively

Is it possible to progress without additional means ?

Next steps planning
