

# FARFISH UPDATE

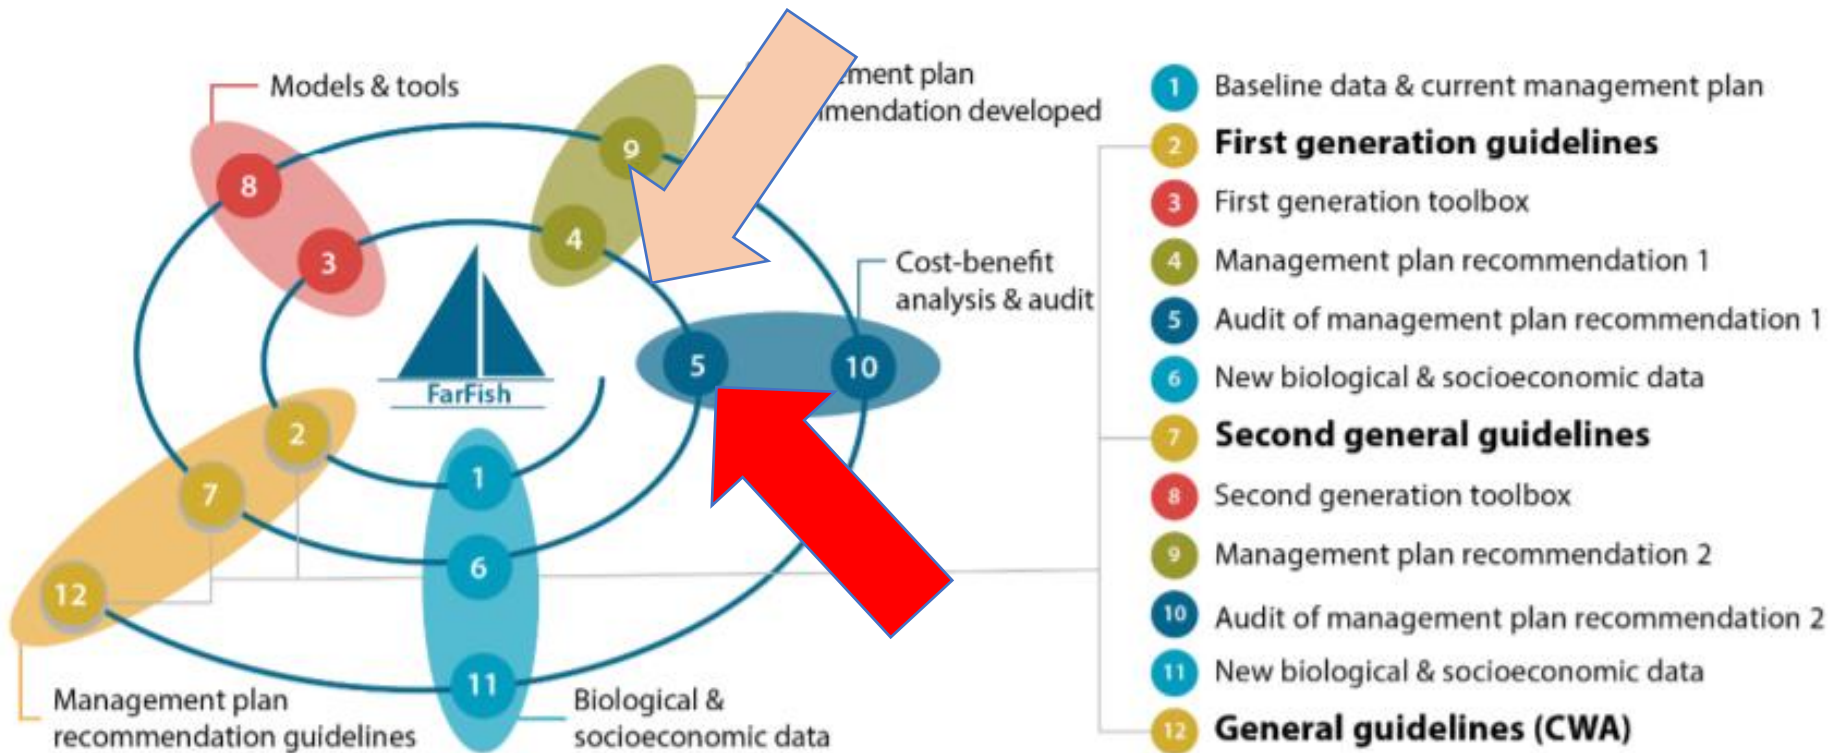

What has happened during the last 6 months

FarFish

# What have we done the last 6 months?

- **D4.3:** MPs are being developed for each CS. Once approved, they will revert back to the LDAC and seek input from stakeholders to implement/revise OTs for second loop of the iterative process.
- **D7.5:** A diploma programme was launched at the annual meeting in June, titled “Marine management and Innovation”.
- **D2.5:** Report on the evaluation of current stock assessment models used in the Case Study Areas.
- Annual meeting + Mauritania/Senegal CS meeting in Las Palmas.
- ICES WKSCINDI workshop on Science-Industry initiatives.
- High Seas workshop “Bringing Fisheries Sustainability into the High Seas: the Case of the Atlantic South West” -> **INTERNATIONAL CONFERENCE**

# Current ongoing work

- **D 2.6.-** Report on biological and ecological data in FFDB pilot
- Soon to start a self-sampling programme in Mauritania to identify black hake species proportion.
- Poster presentation at the WMMC Barcelona, on ORPAGU's work and communication gaps in data flow + incentives workshop.
- Preliminary contact with stakeholders on MR1 results.
- Attending Case Study Leader meeting in Marrakesh.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 727891.
